Web portal / internal system (MVP) Customer, admin or partner portal with core workflows	**95,000 – 210,000**	2 – 4 months
Mobile app with backend iOS and Android from one codebase, plus API	**140,000 – 320,000**	3 – 5 months
Multi-platform system Several portals, mobile apps, payments, multi-tenant structure	**400,000 – 1,000,000+**	6 – 12 months
Payment gateway integration (add-on) Collection, split payments, payouts, refunds, reconciliation	**30,000 – 80,000**	3 – 6 weeks
Cloud / infrastructure setup and handover Containers, TLS, backups, monitoring, runbooks	**18,000 – 60,000**	2 – 4 weeks
Maintenance retainer Tiered response times, security updates, minor changes	**5,000 – 25,000 / month** **or 15–20% of build cost per year**	Ongoing
Time and materials For changing scope or extra work outside a fixed quote	**1,200 – 1,900 / person-day**	As needed

How to quote

- Quote GLCs and large corporates in the upper half of each range. They usually need more documentation, security reviews and UAT rounds.
- Never quote below the low end of a range. The commission is already inside it.
- Give a range only at first contact. Meikigo issues the firm quotation after a scoped discovery phase.
- Fixed-price payment split: 30% on signing, 40% across milestones, 30% on UAT sign-off.
- Every build includes a warranty period for defect fixes. The client owns the IP and source code at handover.
